[Website/Portfolio](#) [LinkedIn Profile](#)

Software engineer with 15+ years of experience delivering reliable, high-quality front-end solutions. Brings strong experience in modern JavaScript frameworks, test-driven development, and cross-functional collaboration to build scalable, maintainable web applications within Agile environments.

<u>Engineering & Development</u>	<u>Quality & Testing</u>	<u>Tools & Delivery</u>
Javascript	Integration testing	Node.js, npm, Yarn
TypeScript	End-to-end testing	Vite, Webpack, Gulp
React	Protractor, Selenium	Git
Vue	Test automation	Agile scrum
HTML	Regression testing	Jira
CSS / Sass / Less	Quality-focused development	Confluence

Professional Experience:

[United States Postal Service — San Diego, CA](#)

7/2025 - Present

Rural Carrier Associate

- Dependable in executing daily mail delivery routes with consistent accuracy, meeting strict schedules and service-level expectations in a high-volume environment.
- Detail-oriented in sorting, organizing, and delivering mail to ensure correct handling, regulatory compliance, and customer satisfaction.
- Self-directed while working independently in a fast-paced setting, managing time effectively and adapting to changing routes, weather, and operational demands.

[Rocket Soccar Confederation](#)

6/2022 - Present

Media Committee Head / Overlay Developer / Stream Producer

- Technical lead responsible for designing and developing live esports broadcast overlays using React, HTML, CSS, Sass, and WebSockets to support real-time match data and viewer engagement.
- Collaborative head of the Media Committee, partnering with league administrators, casters, and production staff to standardize visual assets, improve broadcast quality, and ensure consistent delivery across events.
- Hands-on stream producer overseeing live match broadcasts, troubleshooting technical issues in real time, and ensuring reliable, high-quality streams for competitive online audiences.

[Ezoic — Carlsbad, CA](#)

5/2021 - 12/2022

Software Engineer

Go (GoLang), Vue, JavaScript, TypeScript, PHP, MySQL, HTML, CSS, Git

- Designed and delivered a monthly performance dashboard enabling clients to quickly view ad revenue, engagement, and key site metrics, improving transparency and decision-making.
- Enhanced client-facing dashboards by streamlining workflows and interface interactions, allowing users to manage and update their sites more efficiently.
- Developed and maintained an internal dashboard for external contractors to update site status and operational data, reducing manual coordination and improving data accuracy.

[Study.com - Mountain View, CA](#)

11/2019 - 2/2021

Front-End Software Engineer

AngularJS, JavaScript, TypeScript, CSS, Less, Bootstrap, Gulp, HTML, JSP, Java, MySQL, Selenium, Git

- Collaborated on the design and implementation of reusable layout components for long-form hub landing pages, accelerating page creation while preserving flexibility for custom content.
- Built internal management dashboards that enabled non-technical teams to update and manage website content on demand, reducing engineering dependency.
- Implemented scalable front-end solutions within an AngularJS environment, ensuring consistency, maintainability, and alignment with established design patterns.
- Supported Agile development practices by working closely with designers, product managers, and back-end engineers to deliver high-quality features on schedule.

[Rain Bird — San Diego, CA](#)

8/2018 - 2/2019
